Clear and precise evidence: The Digta digital head start enables you to spend more time with your clients ...

Just imagine: A dictation machine with a familiar, easy to use slide switch for intuitive operation – just like your analogue device. Great editing facilities too – it's easy to edit, insert or delete text passages at any time. Your dictations are sent to a transcription service at the push of a button – it's fast and safe. It looks good, sounds good – and frees you up for client facing work. Now the digital dictation future is at your fingertips ...

Digta products give you the edge:
